## DES PROFESSIONNELS A VOTRE SERVICE

L'équipe Végétal Indoor met son savoir-faire et son expérience au service des professionnels. Entreprise jeune, dynamique et innovante, Végétal Indoor est toujours à l'affut des dernières tendances en termes de décoration d'intérieur et d'objets design.

Spécialistes de la décoration d'intérieur ,en végétaux stabilisés : cadre, tableau, mur, composition, Végétal Indoor vous proposent de vous créer une identité végétale inimitable.

Notre réussite est fondée sur la qualité de nos produits, l'amélioration sans cesse de nos prestations et services et, plus particulièrement sur la satisfaction de nos clients.

Une philosophie, des valeurs, une éthique. Avoir confiance, écouter, entendre, accompagner, conseiller... sont autant de termes que nous nous appliquons à employer avec nos fournisseurs et nos clients.

Nous avons également fait le choix du développement durable : la flexibilité, l'adaptabilité et la proximité d'une production Made in Anjou, et Made in France, font partie intégrante de nos valeurs. Création d'ambiance chaleureuse, zen et harmonieuse au sein d'un espace ,professionnel, Végétal Indoor vous accompagne à chaque étape.

## Preserved Nature since 1984

Verdissimo is part of the Innovaflora group, the world's largest producer of preserved flowers, plants and trees. Preserved plants are a 100% natural and require minimal maintenance.

The preservation process allows us to create a unique decorative product that combines the best of two worlds: The unique beauty of a natural plant combined with the durability of a man-made object.

The goal of Verdissimo company is to enable people worldwide to enjoy natural beauty and balance economy, ease-of-use and respect for the environment

## What are Vegetal Indoor preserved trees and plants

### 100% natural

All preserved Verdissimo products are real. They are natural plants that have been treated with a bio-degradable formula.

### Preserved to last for years

Our unique process, developed with vegetable-based glycerin, replaces the humidity within the plant with a component that does not evaporate and thereby preserve beauty over time.

### Cost-effective

Our preserved trees last for years and significantly lower the need for re-purchasing.

### Easy to maintain and install

The products do not require light or water, leading to significant savings in installation and maintenance.

### Powerful addition to traditional solutions

The preserved products can be successfully mixed with fresh or artificial plants for complete design freedom to generate different environments and effects.

### Respectful with the environment

The Verdissimo preserved plants are more environmentally friendly than fresh cut flowers due to their long life and low energy consumption for transport and storage. The result is a significantly lower carbon footprint than fresh or artificial flowers. Help care for the environment ... One plant at the time.

Last for years

100% natural

No light or water required

## What are Vegetal Indoor preserved trees and plants not

### They are not freeze dried (lyophilized) or dehydrated products

None of the Verdissimo products use freeze-drying for their preservation. The lyophilization suppresses important characteristics of the fresh product for a living appearance.

### They are not growing

To ensure that the plant is at its best and maintain the appearance of a living plant, the preservation process stops any biological process that promotes the aging of the plant.

### They are not artificial

Although the product undergoes a transformation process that stabilizes the natural plant, our process does not include any of the typical components in artificial flowers such as plastic or synthetic fabrics.

### They are not toxic

All our products are designed for daily contact with pets and people. They do not pose a health risk.

# INSPIRE

In Vegetal Indor our inspiration is the vision of our clients, always working to create balance between architecture, functionality and nature:

The natural preserved products create humanized and enjoyable living spaces which allow us to relax and be more creative.

They allow us to soften structural elements of architecture that may seem alien to us.

Bringing nature indoor adds a note of color and creates a unique space.

In areas with elevated noise, the Verdissimo preserved products are sound-absorbing and help create an acoustically pleasant environment.

Natural space dividers help define and customize the environment.
